Notes Nokia:

- Some Nokia mobiles with S60 or Symbian 3 O.S, depending on the software used, will not function correctly in hands-free mode. It is recommended to upgrade your phone to the latest version from Nokia.
- Some Nokia mobiles can improve compatibility with the installation of a driver available from the Nokia website.
- Some Nokia mobiles do not show the time according to the phone settings, but according to time zone, GMT+0. (You can configure the time on the mobile so that it does not use GMT+x and summer time).

Notes Nokia:

- Some Nokia mobiles with S60 or Symbian 3 O.S, depending on the software used, will not function correctly in hands-free mode. It is recommended to upgrade your phone to the latest version from Nokia.
- Some Nokia mobiles can improve compatibility with the installation of a driver available from the Nokia website.
- Some Nokia mobiles do not show the time according to the phone settings, but according to time zone, GMT+0. (You can configure the time on the mobile so that it does not use GMT+x and summer time).

Notes Nokia:

- Some Nokia mobiles with S60 or Symbian 3 O.S, depending on the software used, will not function correctly in hands-free mode. It is recommended to upgrade your phone to the latest version from Nokia.
- Some Nokia mobiles can improve compatibility with the installation of a driver available from the Nokia website.
- Some Nokia mobiles do not show the time according to the phone settings, but according to time zone, GMT+0. (You can configure the time on the mobile so that it does not use GMT+x and summer time).

# NOTES

- / \*Available function in some SEAT models. Although compatible with audio reproduction in Bluetooth Audio Streaming mode, some functions such as Rewind and Fast Forward, as well as the display of information on the artist, title, album, length of song, etc. will depend on the level of compatibility.
- / The mobiles that appear on this list can connect and function in hands-free mode, with different restrictions to operation depending on the model.
- / Warning: The use of earlier software versions can affect the operation of your mobile. It is recommended to always update your mobile to the latest software available from your mobile phone manufacturer. Ask for a current or later version.
- / In some mobiles with Android O.S. it is necessary to accept the request for Access to your contacts (PBAP) when connecting to use your call list.
- / On some mobiles with Windows Phone 7 OS, if an incoming call is taken manually from the mobile when it is connected to the hands-free, the call is switched to a private call (i.e. no sound goes through the car's Bluetooth function). You can switch the incoming call to hands-free manually, using the options on your mobile.
- / This list does not include possible changes made by the mobile phone manufacturers that can affect operation.
- / Some mobiles automatically use the phone's standard ring tone in hands-free mode (over the vehicle's speaker system). If the telephone is in silent mode, it is possible that the tones will not ring when using the hands-free function. It is recommended to always configure an audible ring tone.
